 ■ street fair ■

This September (2022), our project team participated in the annual Avenues St. Fair as part of the Salt Lake City Department of Public Utilities booth!

This community event provided the CCWTP team with an opportunity to

- Introduce members of the community to the project
- Answer questions about the plant's history & planned upgrades
- Share news of the recently awarded BRIC funding\* that will significantly bolster our upgrade efforts.
- Provide tips on keeping up good water stewardship (in line with our 2.5 billion fewer gallons of water used compared to the last 3-year avg!)

Stakeholders were able to sign up for construction activity email updates and walk away with some of our Keep It Pure swag!

\*Read more about BRIC funding on our website under "Project Overview."
